## **Programmes in Insurance 2009**

*For all people employed in the insurance industry who are serious about building a career and achieving a professional qualification and status.*

**NB** For 2009 we have listened to your requests and concerns and introduce the long-awaited introductory Short Courses in the Elements of Insurance to allow admission for everyone who has at least a Senior Certificate.

**ALSO**, as promised, we have redesigned the Programmes and **from 2009 the Programmes are offered on a semester-basis**. This means that examinations can be attempted every six months! This provides a more even spread of your studies during a year, less material to learn for an examination and a two-hour examination paper. Insert each semester will cover approximately half of the subject learning material.

**Registration opens on 01 December 2008 and closes on 31 January 2009**, for all first-time registrations in the Programmes, as well as existing students who are converting to the semester-based Programmes. Existing students who want to complete their current studies on the former (annual) basis can do so during 2009, but need to finalise their registrations by 05 March 2009.

**The Programmes continue to be available in the three main disciplines:**

- Short Term Insurance
- Life Insurance
- Retirement Funds Management

**In each Discipline the studies are offered in the following Courses and Programmes:**

- Introductory Short Course (NOF5) - 12 credits/120 notional hours
  - Introductory Programme (NOF5) - 60 credits/600 notional hours
  - Programme in (NOF5) - 60 credits/600 notional hours
- Short Term Insurance/  
Life Insurance or Retirement  
Funds
- Introductory Programme in Advanced Insurance Practice
  - Programme in Advanced Insurance Practice (2009)
