

My Career

Reflect on your career development

You need to make a career decision and you are not sure where to go to from where you are at the moment. Career decisions are diverse and examples include: "I need to choose what to study next"; "I want to change jobs"; and "I am not sure which modules to choose for my qualification".

You now have the opportunity to reflect on what you want and also what you need to do so that you could prepare for different career opportunities. Answer the following questions and then have a follow-up conversation with a counsellor.

① What is the career problem you wish to solve? (Where are you now?)

② What do you imagine should be different? (WHERE DO YOU WANT TO BE?)

③ What do you need to do to move from where you are now to where you imagine yourself?

④ Where do you start (what is the first thing you will do)?
