

**Unisa's  
10 Catalytic  
Niche Areas**

## INVITATION: Seminar Series

1. Marine Studies, 2. Aviation and Aeronautical Studies, 3. Automotive, 4. Energy, 5. Space Study and Square Kilometer Array, 6. Fourth Industrial Revolution and Digitalisation, 7. Natural Sciences (Biotechnological studies), 8. Health Studies/Medicine, 9. Feminist, Womanist, Bosadi Theorizations, 10. Student Support and Co-Curricular Activities.

# ***UNESCO Chair on ODL's Contribution to Student Support and Co-Curricular Activities, and the Fourth Industrial Revolution and Digitalisation***

As part of the College of Graduate Studies' scaffolded approach to optimising UNISA's catalytic niche areas, we will be constituting a working group for each of the niche areas.

The working groups will be populated with members from all Colleges, and we encourage multi-level participation where everyone from postgraduate students and emerging researchers to full professors and internationally recognised researchers will have opportunities to collaborate and share their scholarly ideas in multidisciplinary engagements. The College of Graduate Studies is excited to launch these working groups with a Catalytic Niche Area Working Groups Seminar Series. The sessions will cover a range of topics and we invite you to join us at the links provided.

If you are unable to attend but you are interested in joining one of more of the catalytic niche area working groups, please contact **Prof Jessica Murray** at [murraj@unisa.ac.za](mailto:murraj@unisa.ac.za)

**Thursday, 23 November 2023  
14:00 – 15:30**

**Join the Seminar on MS Teams**
