

5. Space Study and Square Kilometer Array

INVITATION: Working Group

1. Marine Studies, 2. Aviation and Aeronautical Studies, 3. Automotive, 4. Energy, 5. Space Study and Square Kilometer Array, 6. Fourth Industrial Revolution and Digitalisation, 7. Natural Sciences (Biotechnological studies), 8. Health Studies/Medicine, 9. Feminist, Womanist, Bosadi Theorisations, 10. Student Support and Co-Curricular Activities.

Working Group Session

You are cordially invited to the 4th 2025 series of CGS-facilitated Catalytic Niche Area Working Group meetings, and this session will be dedicated to Space Study and Square Kilometre Array. The series is structured as a celebration of UNISA's catalytic niche area responses as they stand towards the end of 2025. We have invited some of our most high-profile catalytic niche area researchers to share their work, and the sessions will offer an opportunity to reflect on UNISA's 2025 catalytic niche area achievements. Importantly, these multidisciplinary, institutional-level spaces will also allow attendees to reflect on the gaps in our catalytic niche area engagements. This will thus close off the 2025 CGS-facilitated catalytic niche area working groups' work while opening up thinking about and avenues into the catalytic niche area activities for 2026.

For queries, please contact **Prof Murray** at CGScatalyticnicheareas@unisa.ac.za

Wednesday, 19 November 2025
11:00 – 12:00
