## Research Proposal

Writing a good proposal is a critical skill for Masters and Doctoral students. The purpose of a research proposal is to gain support for your plan by informing the appropriate people, in this context your supervisor and Departmental/college research committee. Your ideas or suggestions are more likely to be approved if you can communicate them in a clear, concise, and engaging manner. Knowing how to write a persuasive, captivating proposal is essential for success in your studies. This workshop is aimed at supporting students in writing a research proposal that is scholarly and acceptable. Moreover, the workshop will articulate critical attributes that result in a successful research proposal by unpacking each of the aspects of the research proposal with practical examples.
