CGS Indigenous Epistemologies Seminar Series:

Come and join us for the Seminar Series Week in The College of Graduate Studies on Indigenous Epistemologies from 23-25 September 2020. This seminar series was deliberately chosen because we officially celebrate our rich and diverse heritage during the month of September, and 24 September is designated as the Heritage Day.

You are invited to see how indigenous knowledge is part of our heritage that is in the danger of being lost if we do not promote it. The School of Interdisciplinary Research and Graduate Studies is acutely aware of the fact that promoting indigenous epistemologies will give our students and lecturers the opportunity to attain epistemic freedom that may support sustainable development in our societies.

Define tomorrow.
