

## **INTERNATIONAL YOUTH COMPETITION OF SCIENTIFIC AND CREATIVE WORKS “HORIZON-2100”**

Scientists, economists, financiers, programmers, writers, weather forecasters and just ordinary people - everyone is thinking about the future, near or far. However, there is a category of a special kind - youth in itself, being the main generator of change, represents the foreseeable future and it will have to form subsequent scenarios for the development of the country, civilization and the planet.

In this regard, in 2019 a number of Russian non-profit organizations came up with the initiative to hold the Horizont-2100 International Youth Competition for Scientific and Creative Works. The competition was a success, it was attended by young people from 19 countries of the world and 79 cities and settlements of Russia, and the winners were schoolchildren and students from 12 countries.

In 2020, Horizon 2100 joined and became part of the UN Global Discussion on the future of the world and the role of comprehensive cooperation in building the future, the results of which will be presented in September 2020 at the UN General Assembly.

In this regard, the priority objectives of the competition in 2020: Motivate minded youth from different countries with an active lifestyle to "turn on" their intelligence and

- carry out a creative search for scientific ideas, hypotheses, science fiction ideas about the distant future at the turn of 2100.
- propose solutions to overcome the threats facing the world on the path to sustainable development until 2045.
- offer concrete ideas for building the Future and a positive vision of the sustainable development of mankind.

Pupils and students aged 16 to 26 years of age carrying out research and/or science fiction literary creativity in the subject area of the Competition are invited to participate in the Competition.

The competition is held in three categories:

- For the best scientific, research, scientific and practical work or engineering start up for the period up to 2045.
- The best scientific article reflecting the scientific vision of the future of the planet and humanity at the turn of 2100 and the prospects for the development of its various scenarios.
- For the best creative work - a science fiction story describing imaginary innovative and original ideas, fantastic events, phenomena, processes and future prospects at the turn of 2100, giving them a scientific explanation.

Dates of the Competition and planned events:

- Acceptance of scientific and creative works in the period from 20 March 2020 to 30 April 2020. Keep track of dates.
- Conducting thematic offline and online “Dialogues about the future” (interactive meetings - foresights, debates, sense battles, hackathons): March - May 2020.
- Examination of works: from 1 May to 25 May 2020.
- Definition of works-finalists who took prize I, II, III places and announcement of the results of the Competition: from 26 to 31 May 2020.
- Participation in SPIEF 2020: 5 and 6 June 2020.
- The international youth forum "Shaping the future together", where the winners will be awarded: 1-3 July 2020.
- Participation of the Grand Prix of the winner of the “HORIZON 2100” Competition in the events of 75 of the UN General Assembly on 21 September 2020.

Detailed conditions are presented on the contest website:
