

## DATA ARCHITECT

### SUMMARY OF ROLE

Burger King SA is seeking to employ bright young graduates with a B.Comm IT, Business Informatics or Business Science degrees from a reputable university, with some SQL skills. You will be required to manage and consolidate data from different tables and sources and integrate them into a clean dashboard interface using Qlik Sense.

### ROLE FUNCTION:

- Evaluate and understand general business requirements.
- Convert these requirements into a business solution using Qlik Sense.
- Create master sheets using Qlik Sense.
- Develop Systems from the back end for ingestion into Qlik Sense.

### MINIMUM REQUIREMENTS:

- B.Comm (Business Informatics, Science, or Information Technology)
- At least 1-2 years working experience (preferable)
- Sound knowledge of SQL
- Experience in database maintenance and management would be preferential.
- Prior exposure to IT related training, specifically training in SQL, is beneficial for the fast tracking of a candidate's career.

### COMPETENCIES

- Passion for analytics and business improvement
- Strong problem-solving skills
- Entrepreneurial spirit
- Self-motivated & able to work alone
- Hard worker and delivery focused
- Strong logical reasoning and problem-solving skills
- Digitally savvy
