Unisa's 10 Catalytic Niche Areas

Catalytic Niche Area Foresight in Research

The College of Graduate Studies invites you to the 6th meeting of the Foresight Studies Working Group. This working group was created to institutionalise foresight studies and future literacies as strategic scholarly capabilities that enhance the relevance, responsiveness and long-term sustainability of UNISA's catalytic niche areas. The working group directly supports catalytic niche area optimisation by enabling academics and postgraduate students to anticipate future risks and opportunities, design future-facing research, and strengthen pathways from knowledge production to societal and economic impact.

Workshop 6: EU-Funded Research

Focus:

This workshop explores European Union research funding opportunities within the context of SA–EU cooperation and how such funding can strategically support both research excellence and downstream innovation.

Guest Speaker:

Eudy Mabuza
SA Science Councilor
Brussels, Belgium

Wednesday, 5 August 2026
12:00 – 13:00
